

You can get your

FCC Technician Amateur Radio License in *One Day* with

TECH IN A DAY™

Note: *Morse code is no longer needed for any
amateur radio license.*

How?

If you can spare one Saturday, chances are very good you can get your amateur radio Technician license. Don't worry if you're not technically inclined, this method depends much more on short-term memory than technical knowledge or background. By spending six 45-minute sessions studying the questions and answers from the FCC exam question pool, you'll remember enough to pass the exam that is given at the end of the class. The test is 35 multiple-choice questions and you need 26 correct to pass. This method has worked with teenagers to senior citizens.

NOTE: This is a study course based on the exam question pool – no lectures are given at the course.

Why?

With a Technician license, you can use VHF and UHF amateur radio bands, meaning when the phones go dead and your cell phone doesn't get reception, you will be able to get a message out with a simple hand-held radio. For emergency workers, adding Amateur Radio capability adds to your communications abilities. And, it is great fun with interesting people to meet.

What Should You Do?

Get an FRN (no Social Security number required):

<https://apps.fcc.gov/coresWeb/regEntityType.do>

Fill out NCVET Form 605:

[NCVEC QUICK-FORM 605 APPLICATION](#)
